C

Cardiac arrest; *see* **Heart arrest**
Catheterization
Inferior vena cava catheterization in the neonate by the percutaneous femoral vein method (Serrao et al). 1996;16:129-32
Intravenous access in newborn infants: impact of extended umbilical venous catheter use on requirement for peripheral venous lines (Loisel et al). 1996;16:461-6
Umbilical artery catheter blood sampling alters cerebral blood flow velocity in preterm infants (Lott et al). 1996;16:341-5
Catheterization, central venous
Cardiac arrest in an extremely low birth weight infant: complication of percutaneous central venous catheter hyperalimentation (Sasidharan et al). 1996;16:123-6

Silicone-rubber catheter fracture and embolization in a very low birth weight infant (Ochikubo et al). 1996;16:50-2
Ventilatory management casebook: pleural effusion caused by intrathoracic central venous hyperalimentation (McGettigan and Goldsmith). 1996;16:147-50
Catheterization, midline
Use of midline catheters in low birth weight infants (Lesser et al). 1996;16:205-7
Catheterization, peripheral
A cluster of atypical skin lesions in well-baby nurseries and a neonatal intensive care unit (Keroack et al). 1996;16:370-3
Intravenous access in newborn infants: impact of extended umbilical venous catheter use on requirement for peripheral venous lines (Loisel et al). 1996;16:461-6
Ceiling tiles
Cost analysis of ceiling tile replacement for noise abatement (Berens and Weigle). 1996;16:199-201
Central venous catheterization; *see* Catheterization, central venous
Cerclage
The CLIPED procedure: an attempt to improve perinatal outcome in hopeless situations (Weinstein et al). 1996;16:27-30
Nitroglycerin facilitates therapeutic cerclage placement (Cousins and Pue). 1996;16:127-8
Cerebral blood flow; *see* Brain, blood supply
